# About Company

Founded in 2017 by clinicians for clinicians, Advanced Primary Care Group are an innovative clinical education and staffing services provider, delivering real-time solutions to practices throughout the UK.

An innovative model of primary care delivery involves utilising the skills of pharmacists and advanced practitioners in helping GP practices and primary care providers fill their service gaps practically and cost-effectively.

Advanced Primary Care Group (APCG) was formed in 2017 with an objective to provide training to NHS staff. APCG was set up by clinicians for the clinicians. We aim to provide clinical knowledge and training which benefits clinicians and the NHS organisations.

## APCG- Training and Development Bridge

APCG is known for its quality training programs and skilled clinicians who run advanced acute clinics independently. Practices with shortages of GPs have appreciated the support we provide.

Whether you are a clinician or an organisation, APCG has plenty to offer in support.

# Our Services

## RECRUITMENT

APCG Pharmacists are trained appropriately to work at each level. We have a robust system to gauge clinical potential of our clinicians and help them to identify their needs. They can upskill themselves whilst working with APCG.

## EDUCATION

APCG endeavours to bring quality education and training programs relevant to clinical colleagues' needs. The scheduled Masterclasses throughout the year provide a structural approach to clinicians to manage their CPDs. We are open to work with other organisations and pharma companies to provide relevant and quality training either free or at lowest possible costs to colleagues.

## TRAINING

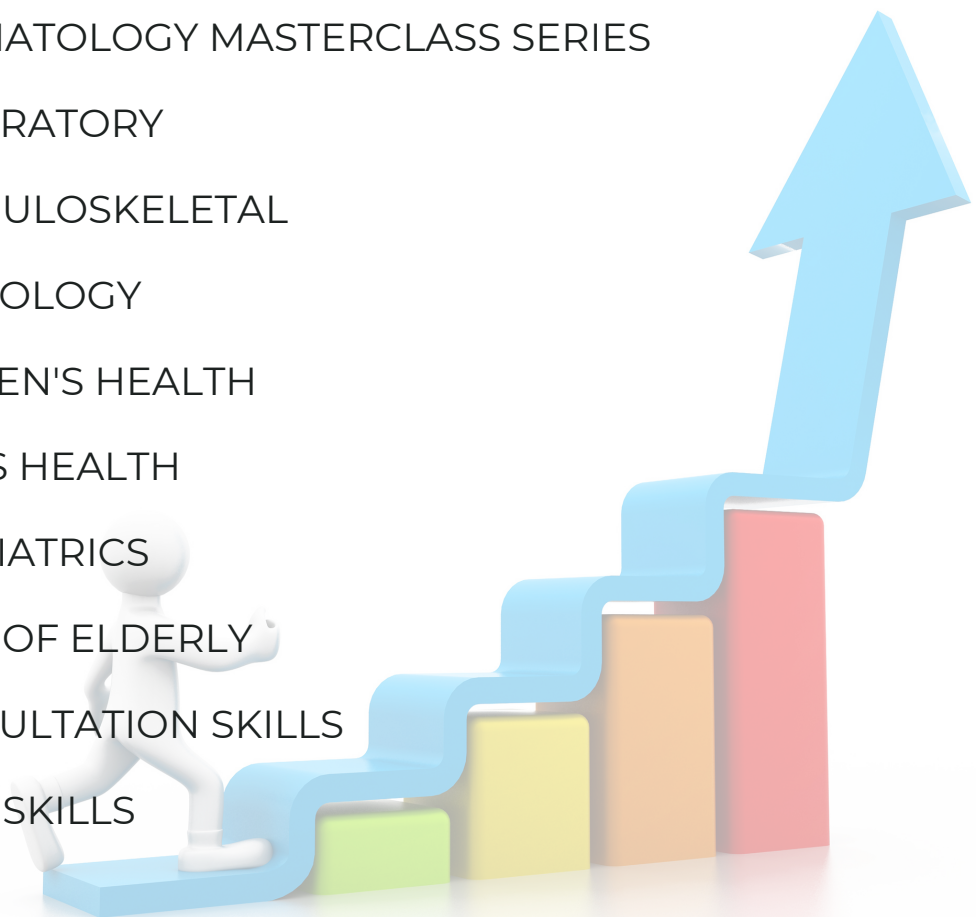

APCG has partnered with practices and DMPs/ DPPs who have excellent skills to pass on to the IP students and help them develop skills and portfolio as an IP. APCG training programs help pharmacists develop their skills to match expectations of the future NHS.

# Minor Illness Course

Attendees said that they would recommend the course to colleagues.

Attendees said that the course was well structured and the content was relevant to their practice.

## TESTIMONIALS

*"Just wanted to say a big thanks to the APCG team. The minor ailment workshop was amazing and really enjoyed every minute of it. Highly organised course with excellent resources available to you for reference later on and during the workshop. I would say this is a must for all clinical pharmacist working in pcn/gp areas as it equips you with a better diagnostic skill. Thank you all!"*

**NASIR MOHAMMED-HUSSAIN**  
CLINICAL PHARMACIST

*"Absolutely fantastic course! Well structured and well delivered. Perfect for anyone wanting to gain skills in minor ailments/illness and see patients in general practice. Fantastic speaker and workbooks are a great resource to refer back to. Well done everyone who worked so hard in putting this all together."*

**DEBBIE LOFTUS**  
NURSE PRACTITIONER

# IP Training

## Are you looking to become an Independent Prescriber?

The requirement for training spaces for trainee pharmacist prescribers to complete their supervised training has arisen as a result of NHS England's announcement of funding to assist more pharmacists from community pharmacies become prescribers. For pharmacists trying to become independent prescribers, this is now the main obstacle.

The Advanced Primary Care Group is an organisation which specifically caters for the development of pharmacists.

As an organisation we can provide experienced doctors and non-medical prescribers to act as designated practitioners for the independent prescribing course.

We also provide post graduate training courses specifically for pharmacists who wish to become competent in prescribing for a wide range of clinical conditions both in the NHS and private sector.
